

Enrolment Gating — Tester Guide

How course milestones work — written for people testing the product, not for developers.

What you are testing: Can an instructor lock an advanced course behind a beginner course?

App URL: `http://localhost:3001`

Generated: 2026-08-03 · Screenshots from the live local app

In one sentence

An instructor picks courses that must be finished first (“milestones”). A student who has **not** finished those milestones can still **see** the advanced course, but cannot **enrol** until every milestone is complete.

Instructor sets milestones → Student sees “Requires ...” → Student finishes milestone course → Student can enrol

Accounts you will use

Who	Email	Password	Use for
Instructor	<code>instructor@example.com</code>	<code>student123</code>	Section 1
Student	<code>student-prereq-a@example.com</code>	<code>student123</code>	Section 2
Admin (optional)	<code>admin@example.com</code>	<code>student123</code>	Appendix

Courses in this guide

Role	Course	URL
Milestone (must finish first)	Introduction to Ruby	<code>http://localhost:3001/courses/intro-to-ruby</code>
Advanced (locked)	Linear Algebra: Foundations	<code>http://localhost:3001/courses/linear-algebra-foundations</code>

Section 1 — Login as Instructor

Goal: Configure Linear Algebra so students must complete Introduction to Ruby first.

Step 1.1 — Sign in

1. Open `http://localhost:3001/users/sign_in`
2. Email: `instructor@example.com`
3. Password: `student123`
4. Click Sign in

Log in

Email

Password

☐ Remember me

Log in

[Forgot your password?](#)

[Didn't receive unlock instructions?](#)

Sign-in page — use the instructor account

Step 1.2 — Open the advanced course

1. Go to Courses, or open directly:

`http://localhost:3001/courses/linear-algebra-foundations`

2. Confirm you are looking at **Linear Algebra: Foundations**
3. Click **Edit** (instructors see edit controls on their courses)

Linear Algebra: Foundations

Mathematics · published July 18, 2026

Vectors, matrices, and linear transformations -- the maths behind machine learning and graphics.

Complete these courses first

- [Introduction to Ruby](#)

[Enrol now](#)

Lessons

1. Vectors

A vector is an ordered list of numbers representing magnitude and direction.

2. Matrices

A matrix is a rectangular array of numbers used to represent linear transformations.

Advanced course page — open [Edit](#) from here

Step 1.3 — Set the milestone

1. On the Edit Course page, scroll to **Complete these courses first (milestones)**
2. Tick **Introduction to Ruby**
3. Click **Update Course**

What “done” looks like: Introduction to Ruby stays checked after save. Students who have not finished that course will now be blocked from enrolling in Linear Algebra.

Milestones section — Introduction to Ruby is selected

Tip for testers: You can tick more than one milestone. The student must finish **all** of them (AND), not just one.

Section 2 — Login as Student

Goal: Confirm a student without the milestone cannot enrol, can still see the course, and knows which course to finish first.

Before you start: Sign out of the instructor account (or use a private/incognito window), then sign in as the student below. Mixing sessions will confuse the screenshots.

Step 2.1 — Sign in as a blocked student

1. Open `http://localhost:3001/users/sign_in`
2. Email: `student-prereq-a@example.com`
3. Password: `student123`
4. Click Sign in

This account has **no enrolments** yet — perfect for seeing the lock.

Sign-in page — use the student account

Step 2.2 — Open the catalogue

1. Go to `http://localhost:3001/courses`
2. Find **Linear Algebra: Foundations**

Expect: The course is still listed (not hidden). Under the description you should see orange text: **Requires:** **Introduction to Ruby**

The screenshot shows the 'Courses' section of the ChatBar AI Learn platform. At the top, there is a navigation bar with 'ChatBar AI', 'ChatBar AI Learn', 'Subjects', and 'Courses'. On the right, a user profile 'Prereq Student A' is visible. Below the navigation bar, the 'Courses' section displays two course cards. The first card is for 'Introduction to Ruby' (Programming, Level 3), described as 'A beginner-friendly tour of the Ruby programming language. Covers syntax, blocks, classes, and...'. The second card is for 'Linear Algebra: Foundations' (Mathematics, Level 2), described as 'Vectors, matrices, and linear transformations -- the maths behind machine learning and graphics.' Below this description, it states 'Requires: Introduction to Ruby' in orange text. Both cards feature the 'LMS LEARNING HUB' logo and a 'Discover, Learn, Succeed' tagline.

Catalogue — locked course still visible, with "Requires: ..."

Step 2.3 — Try to enrol in the advanced course

1. Open `http://localhost:3001/courses/linear-algebra-foundations`
2. Read the yellow box **Complete these courses first**
3. Confirm Enrol is not available as a normal enrol action

Expect: A list of missing courses (link to Introduction to Ruby). Student cannot enrol yet.

Linear Algebra: Foundations

Mathematics · published July 18, 2026

Vectors, matrices, and linear transformations -- the maths behind machine learning and graphics.

Complete these courses first

- [Introduction to Ruby](#)

[Enrol now](#)

Lessons

1. Vectors

A vector is an ordered list of numbers representing magnitude and direction.

2. Matrices

A matrix is a rectangular array of numbers used to represent linear transformations.

Course page — blocked enrol + link to the milestone

Step 2.4 — Open the milestone course (allowed)

1. Click the link to Introduction to Ruby, or open
`http://localhost:3001/courses/intro-to-ruby`
2. Confirm this course does **not** show a milestone lock
3. Enrol and complete **all** lessons if you want to test unlock

Unlock rule (plain language): After every lesson in Introduction to Ruby is marked completed, go back to Linear Algebra — Enrol should work normally.

2. Variables and basic types

Ruby has Integers, Floats, Strings, Symbols, Arrays, and Hashes as its core data types....

3. Methods and blocks

Methods are defined with def. Blocks are anonymous chunks of code passed to methods...

Milestone course — student can enrol here without a lock

Student checklist

#	Check	Pass?
1	Catalogue shows Requires: Introduction to Ruby	☐
2	Linear Algebra page shows "Complete these courses first"	☐
3	Student cannot enrol in Linear Algebra yet	☐
4	Student can open / enrol in Introduction to Ruby	☐
5	(Optional) After finishing all Ruby lessons, enrol on Linear Algebra works	☐

Appendix — Admin force-enrol (optional)

When to use: An admin needs to put a student into a locked course without waiting for milestones.

1. Sign in as `admin@example.com` / `student123`
2. Open Admin → Users → `student-prereq-a@example.com`
(or `http://localhost:3001/admin/users/4`)
3. Under **Force-enrol in course**, pick Linear Algebra: Foundations
4. **Without** the skip checkbox → enrol should fail
5. **With Skip prerequisite check (force)** ticked → enrol succeeds

The screenshot shows the ChatBar AI Admin interface. The header includes the ChatBar AI logo and navigation links: ChatBar AI Learn · Admin, Subjects, Courses, Users, Certificates, Tags, Settings. There are also links for 'Back to site' and 'admin@example.com'.

The main content area is for the user `student-prereq-a@example.com`. It includes a 'Student' label and buttons for 'Edit', 'Send password reset', and 'Delete'.

Statistics for the student are displayed in a grid:

- ENROLMENTS: 0
- LESSONS DONE: 0
- AVG SCORE: —
- LAST ACTIVITY: 2026-08-03

Below the statistics, there are three sections:

- Enrolments**: No enrolments yet.
- Recent lesson completions**: No completions yet.
- Ratings given**: No ratings yet.

The **Force-enrol in course** section includes a dropdown menu with 'Introduction to Ruby' selected, a checkbox for 'Skip prerequisite check (force)' which is checked, and an 'Enrol' button.

The **Account** section shows the following details:

- CREATED: 2026-07-29
- SIGN-IN COUNT: 3
- CURRENT SIGN-IN IP: ::1
- LOCKED?: No

Admin user page — Force-enrol + Skip prerequisite check

Quick reference

Situation	What the student sees
No milestones on the course	Normal Enrol button
Milestones not finished	"Requires ..." + locked enrol
All milestones finished	Normal Enrol button
Already enrolled before a milestone was added	Stays enrolled (grandfathered)
